

Camera housing K/MT 213

Our pressure-proof titanium camera housings are equipped with a window on the front and with connectors on the rear side.

You can choose between a plain window or a cone shaped one made of bore silicate glass, perspex or sapphire with an opening angle of 2 times 44 degrees, particularly suitable for macro images.

We also offer complete technical systems with e. g. digital camcorder & recorder, micro color cameras PAL & NTSC, internal electronics, power supply and software.

We design and manufacture camera housings according to your specific requirements regarding length, equipment, operation depth and other specifications.
